## Summary

Junior Frontend Developer specialized in React, with hands-on experience building responsive web applications using React, JavaScript, HTML, and CSS. Completed multiple projects including task management apps, weather apps, and a basic e-commerce application using React and Next.js. Strong understanding of components, props, state management, hooks, routing, and UI development. Passionate about writing clean, maintainable code and continuously improving skills through real-world practice.

## Skills

Next.js	React
React Router	JavaScript (ES6+)
HTML5	CSS3
Tailwind CSS	Bootstrap
Git & GitHub	Python (OOP)

## Projects

### Ecommerce App – (Next.js)

- Built an **e-commerce web application** using **Next.js** and **React**.
- Implemented **routing** and **dynamic pages**.
- Created **reusable components** and handled **state with hooks**.
- Designed **responsive UI** and **product listings**.

### Multi-Page App with Routing – (React)

- Built a **responsive portfolio website** with **React**, **React Router**, and **Tailwind CSS**.
- Created **reusable components** and implemented **multi-page routing**.

### Task Manager App - (React)

- Built a complete **task management system** with **React**.
- Implemented **CRUD operations** (add, edit, delete, toggle tasks).
- Used **localStorage** for **persistent state management**.

### Investment Calculator - (React)

- Developed a **financial calculator** to compute compound investment returns.
- Used **controlled components** and **real-time calculations** with **React hooks**.

### Weather App – (JavaScript)

- Developed a **weather application** using **Vanilla JavaScript**.
- Integrated **public weather APIs**.
- Implemented **real-time data fetching** and **search functionality**.
